

## **Matrix Switch Corporation MSC-CP8X4E 8x4 Elastomeric Remote Button Panel**

Matrix Switch Corporation [remote control panels](#) utilize the TCP/IP protocol over standard Ethernet connected networks, providing high flexibility in installation location, whether located in the same rack as the controlled router or across the world via the Internet.

Many Matrix Switch Corporation button panels are offered in two model variations. Models that end with an 'E' employ individually rear lit rubber elastomeric buttons with excellent tactile feel and high reliability gold contacts. Models ending with 'V' use the same industry standard re-legend-able switches found on the top of the line production switchers.

For applications where video and audio are routed as separate signals the MSC-CP8X4E supports audio breakaway with Audio and Video toggle buttons.

### **Feature Highlights**

- Audio break away support
- Web page configuration interface
- Compatible with Matrix Switch Corporation video routers
- Software updates via Ethernet port
- Backed by a full 2 year manufacturer parts and labor warranty

### **Additional Features**

- Several panels can be used to control the same video/audio router
- Configurable source and destination offsets allow for specifying what portion of the routing matrix a panel will control
- DHCP support for centralized/automatic network configuration

### **Specifications**

<b>Size</b>	19"W x 1.75"H x 1.5"D
<b>Rack Size</b>	1RU
<b>Weight</b>	1.5 lbs
<b>Power</b>	5 VDC
<b>Storage Temp</b>	-10 Through +50 Deg C
<b>Operating Temp</b>	0 Through +40 Deg C
<b>Humidity</b>	0 Through 90% Non-Condensing
<b>Warranty</b>	2 Years Parts & Labor
<b>Ethernet</b>	10 Base-T
